PACKING SHEET

ART. 211**Denomination: PTFE -G + ARAMIDICO**

TYPE : *Diagonally braided from gPTFE (PTFE with incorporated graphite), reinforced at the corners with continuous Aramid yarn, lubricated with silicone oil. It is a high performance multi-yarn packing, which combines the advantages of the supple gPTFE material with those of tough and durable Aramid. This results in reduced shaft-wear and better thermal conductivity than standard Aramid packings.*

APPLICATIONS: *Multi-purpose packing, particularly well suited for use in piston-pumps, mixers, stirrers, reactors for industrial and chemical process valves, good for high pressure applications. Can be used with a wide variety of media including abrasive ones: cold and hot water, steam, solvents, oils, greases, diluted acids and lyes, brine, sewage etc.*

NOT SUITABLE FOR: *Highly concentrated acids and lyes, alkali metals, fluorine and fluorine compounds at high temperatures.*
